

## **Amine A230**

As the professional manufacture, we would like to provide you Zhongyuan® Amine A230. And we will offer you the best after-sale service and timely delivery.

A230 is A liquid complex amine catalyst, A gel and blowing balance catalyst that can be used in the production of low density to high density foams and is specially designed for use in undestabilize foams formula.

As the professional manufacture, we would like to provide you high quality Zhongyuan® Amine A230. And we will offer you the best after-sale service and timely delivery. We have achieved remarkable success in this domain as a result of our focused approach, timely delivery, and ethical company philosophy.

### **Amine A230 Summary:**

Zhongyuan® Amine A230 is A liquid complex amine catalyst, A gel and blowing balance catalyst that can be used in the production of low density to high density foams and is specially designed for use in undestabilize foams formula.

As the professional manufacture, we would like to provide you Amine A230 made in China. And we will offer you the best after-sale service and timely delivery.

### **Amine A230 Detail**

1. Compared with A33, A-230 has stronger blowing up efficiency and the resulting foam plastic also has A better feel
2. It can be applied into the formula which without any auxiliary foaming agent
- 3 there is A balance of gel and blowing up effect, so that the foam plastic has air permeability
- 4 usage is the same as A-33

**Amine A230 Applications :Industrial**

Widely used in soft, semi rigid, rigid polyurethane foam, elastomers

**Amine A230 Usage&Packing:**

Usage:Add into polyol and full mixing

Packing: 25 Kgs
