

Rigid Foam Blended Polyol

As a professional Zhongyuan® Rigid Foam Blended Polyol manufacture, you can rest assured to buy Rigid Foam Blended Polyol from our factory and we will offer you the best after-sale service and timely delivery.

Blended polyol is a highly specialized product developed to meet the needs of the applicable market. It is based on one or more polyether (or polyester) polyols, combined with special catalysts, foam stabilizers and foaming Auxiliaries, such as auxiliaries, are processed in the factory through secondary compounding.

The following is the introduction of high quality Zhongyuan® Rigid Foam Blended Polyol, hoping to help you better understand Rigid Foam Blended Polyol. Welcome new and old customers to continue to cooperate with us to create a better future! Due to our focused approach, timely delivery and ethical business policy, we have been able to gain tremendous success in this domain.

Rigid Foam Blended Polyol summary

Zhong Yuan is professional China Zhongyuan® Rigid Foam Blended Polyol manufacturers and China Rigid Foam Blended Polyol suppliers for many years. As the professional manufacture, we would like to provide you high quality Rigid Foam Blended Polyol with right price. And we will offer you the best after-sale service and timely delivery.

Blended polyol is a highly specialized product developed to meet the needs of the applicable market. It is based on one or more polyether (or polyester) polyols, combined with special catalysts, foam stabilizers and foaming Auxiliaries, such as auxiliaries, are processed in the factory through secondary compounding.

We always think and practice corresponding to the change of circumstance, and grow up. We goal at the achievement of a richer mind and body and also the living for Manufacturer of China Hot Sale Seasons for Polyurethane Rigid Insulation Foam Polyol Blended, Through additional than 8 years of small business, we have now accumulated rich experience and advanced technologies during the manufacturing of our products. Manufacturer of China Polyol Isocyanate, Polyol Mdi, Profession, Devoting are always fundamental to our mission. We've got always been in line with serving customers, creating value management objectives and adhering to the sincerity, dedication, persistent management idea.

We are going to make every single effort for being excellent and excellent, and accelerate our ways for standing while in the rank of international top-grade and high-tech enterprises for High Quality China Rigid Foam Blended Polyol, To better expand market place, we sincerely invite ambitious individuals and providers to affix as an agent.

High Quality China Polyether Polyols, we've been fully determined to control the whole supply chain so as to deliver quality solutions at competitive price in a timely manner. We're keeping up with the advanced techniques, growing through creating more values for our clients and society.

Rigid foam blended polyol detail

Rigid foam blended polyol is mainly used for specific polyurethane foam products produced by mass machinery. The main components of the blended polyol are as follows:

(1) Polyether (or polyester) polyol are available in a single form or in combination with polyols of various specifications;

(2) Polymer polyol;

(3) Crosslinking agent, usually a low molecular glycol;

(4) Catalysts, mostly compound catalyst systems;

(5) Blowing agent;

(6) Foam stabilizer and cell opener;

(7) Auxiliaries such as anti-aging agent and combustion-supporting agent;

(8) Color paste, etc. The main raw materials of blended polyol are one or more polyols and polymer polyols, which are fed into the mixing kettle in proportion from several storage tanks and metering pumps, under the protection of 40~50°C and dry nitrogen. Stirring, various auxiliary agents are sequentially metered into the mixing kettle through the storage tank and the measuring cylinder, and then put into the adjusting kettle after mixing, and the necessary fine adjustments are made according to the actual needs and the gap of the batch mixing.

Rigid Foam Blended Polyol application

Adhesives, thermal insulation materials, imitation woods and building materials etc.

Rigid Foam Blended Polyol packing

200kgs/drum
